

ABSTRACT

1 A video data and web site data stored compact disk (CD) comprises: a first
2 data zone for storing and providing video data to a VCD player for reproduction,
3 and a second data zone for storing and providing video data of a plurality of web
4 pages for a browser to execute hypertext link with the first data zone, so that the
5 VCD player can perform playback of the video data stored in the first data zone
6 when the CD is placed in the VCD player or the browser can access the web pages
7 when the CD is placed in a computer.
